

Hello,

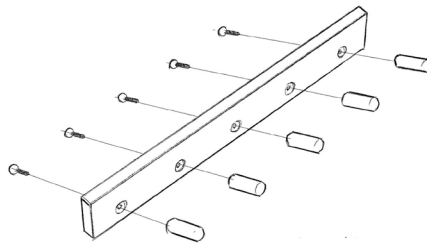

Your coat rack is delivered unassembled to minimise shipping costs and environmental impact.

If anything is missing, or you have any problems with installation, please contact us through Amazon or via [help@larhn.com](mailto:help@larhn.com) and we will be happy to help.

We always respond within 24 hours and usually much sooner!

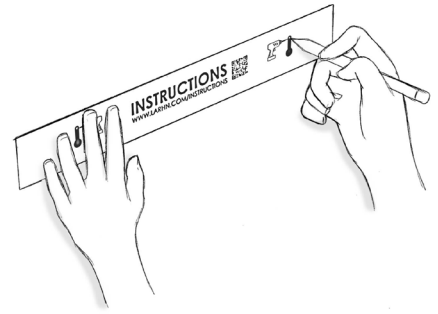

John Verkroost  
Founder, LARHN

1

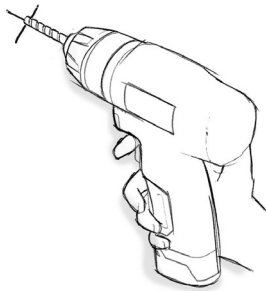

Attach the hooks to the wooden board using a PH2 screwdriver. The polished round hooks can be slippery. If you have difficulty during assembly, we suggest using a grippy glove or cloth to hold the coat rack or hooks tightly.

2

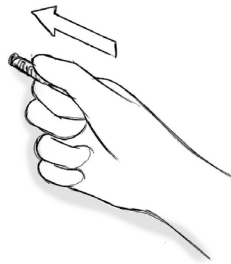

Determine the desired placement for the coat rack using the included template and mark the locations for the holes to be drilled.

3

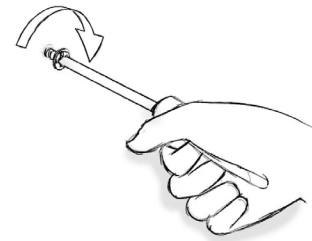

Drill the holes in the appropriate locations. You will need a 8 mm drill bit to match the included wall-plugs.

4

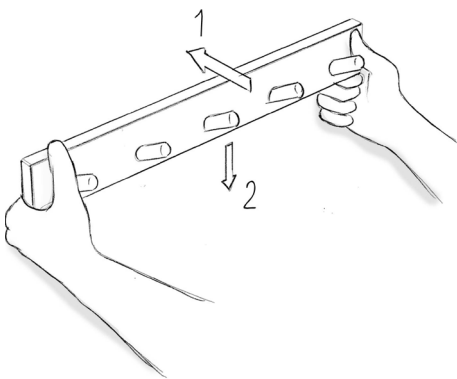

Insert the wall-plugs into the holes.

5

Screw in the screws into the wall-plugs leaving enough of the screw showing for the magnetic knife rack to slide over (approx 3-5 mm).

6

Install the coat rack by placing the slots in the back over the screws and then slide it down to lock. Adjust the screws and repeat as required for a secure fit.
